

Analytical Laboratories

Thurston Conservation District offers this list as a service to residents of Thurston and neighboring counties and does not accept responsibility for transactions between businesses on this list and the customers who call them.

Please call Thurston CD for comments or changes.

Questions? Call 360.754.3588 // tcdadmin@thurstoncd.com

Thurston Conservation District's soil nutrient testing program does not include contamination testing. This sort of testing is performed by specially accredited analytical labs. The list of analytical laboratories below is drawn from the Dept. of Ecology's [web map](#), which lists accredited analytical laboratories throughout the state.

Inclusion below does not constitute a recommendation for a lab, but is provided merely as a reference to show labs in Thurston County that may provide relevant testing services. The brief summary of services is meant to outline types of testing that may be of interest as part of ruling out soil contaminants. We recommend following up with each lab for the most up-to-date information on their services.

Organization	Contact Information	Service
Libby Environmental	3322 South Bay Road NE Olympia, WA 98506 Website: http://libbyenvironmental.com Email: libbyenv@gmail.com Phone: 360-352-2110	See website for full range of services. Provides tests for heavy metals, organics (VOCs, PCBs, etc.), and hydrocarbons (diesel, gasoline, etc.).
